

Biogas Systems

Earn green by going green.

**Times have changed.
Manure lagoons can now
be profit centers.**

Pro-Act Biogas Systems
Managing manure and collecting
biogas economically.

The market is waking up to the environmental and economic benefits of collecting and utilizing methane.

Pro-Act Microbial has developed and tested a biogas digester for manure and other organic wastes that is both economical and easy to operate.

The Pro-Act biogas digester provides the same benefits as most conventional anaerobic digesters.

Odor control

Converting raw manure to energy

Creating a gentle fertilizer from raw manure

Generating manure solids that can be used in bedding

Reducing green house gas emissions

In addition, the Pro-Act biogas digester excels in the ease of maintenance and operation.

Pro-Act can tailor a design to fit your needs. Whether you have 100 cows or 10,000, Pro-Act's system will deliver biogas effectively and economically.

For more information on the
Pro-Act biogas digester, give us
a call.
